

Determining the Best of the Best

“It takes a great deal more than high revenues and lots of employees to rank high on our index. The landscape of property firms – including owners, developers, service providers and others – includes some of this country’s most innovative, high-profile and socially conscious firms. But other considerations are critical as well, including employment stability, long-term management tenure, a consistent company history under the same name and certain aspects of geographic and sector diversity. When we balanced these elements, we develop a picture of what it really takes to be the best in the industry, with a ranking that reflects the most significant and talented commercial real estate firms.”
